OBJECTIVE

Computer Science undergraduate specializing in AI & ML, with interests in robotics, IoT, and exploring how technology and automation can work together in hardware systems. Skilled in basic Python, web development, video editing, and UI/UX design, with a focus on creating creative, practical, and user-friendly projects in both software and hardware.

EDUCATION

KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY(**KIIT)**

B.Tech in Computer Science & Engineering (**AI & ML**)

- Core Areas: Artificial Intelligence, Machine Learning, Web Development, Data Structures
- Member: KIIT Robotics Society (Video Editing Team)

TECHNICAL SKILLS

- Hardware & IoT: Basic Arduino and ESP32 programming
- Languages: Python, C/C++, HTML, CSS, JavaScript
- Tools & Platforms: Figma, davinci resolve , CapCut, VN, Blender, Spline, GitHub
- Other Areas: UI/UX Design, Video Editing, 3D Modeling

PROJECTS

- Smart-Traffic-Management-Systern
- Project at GFG Hackathon | Web + AI + Federated Learning Event-Management-System
- Obstacle Detection System – Arduino Uno + Ultrasonic Sensor
- Line Follower Robot – Arduino Uno + IR Sensors

LANGUAGES

- English
- Hindi
- Bengali
- Assamese
